Working Group Session

You are cordially invited to the 3rd 2025 series of CGS-facilitated Catalytic Niche Area Working Group meetings. The theme for series 3 is “Catalytic Niche Area Sustainability, Skills Transfer and Amplifying Emerging Scholarly Voices”, and this session will be dedicated to 4IR and Digitalisation. This series will offer an opportunity for emerging scholars to share their catalytic niche area research. By nurturing and prioritising emerging scholars’ catalytic niche area work, we will be fulfilling crucial intellectual mentoring, capacity development and skills transfer mandates that will all serve the long-term sustainability of UNISA’s catalytic niche area work. We thus encourage all members of the UNISA community to attend so that our presenters may benefit from richly diverse feedback, questions and reflections.

For queries, please contact **Prof Murray** at murraj@unisa.ac.za

Tuesday, 30 September 2025
11:00 – 12:00
